Tag: Perceived health

Perceived health is an indicator of overall health status. It can reflect aspects of health not captured in other measures, such as incipient disease, disease severity, aspects of positive health status, physiological and psychological reserves and social and mental function. Perceived health refers to the perception of a person’s health in general, either by the person himself or herself, or, in the case of proxy response, by the person responding. Health means not only the absence of disease or injury but also physical, mental and social well-being.

NOTE TO DATA USERS:
There are 4 different ways to enter the depression module, as described in the conditions below. The flow is based on responses to three screener questions: SCR_Q21, SCR_Q22 and SCR_Q23. Those respondents who said "yes" to the first screener question (SCR_Q21) are not asked the second and third screener questions, so they will go to DEP_Q01A. Respondents who say "yes" to the second screener question (SCR_Q22) are not asked the third screener question, so they will go to DEP_Q02. Those who say "yes" to the third screener question (SCR_Q23) will go to DEP_Q09. Finally, those who say no to all three screener questions will go to the start of the suicide sub-block (DEP_B27).

Programmer:

For the KEY PHRASES that are associated with DEP_Q24A to DEP_Q26BB as well as SUI_Q01, SUI_Q04A and SUI_Q06A, please create a parallel block to display the list of KEY PHRASES that can be triggered at any point during the module by pressing <CTRL D>. Call Suicide block (SUI).

Content type: NOTE TO DATA USERS:
The Suicide (SUI) sub-block is triggered here. All respondents in the survey will be sent here, as all will receive the suicide questions. Some respondents will enter the SUI module after they have gone through the previous depression questions, while respondents who do not meet the depression criteria will directly go to the suicide questions (note the flows in the previous questions that send respondents to DEP_B27).

DEP_C27

If DEP_D27A >= 5, go to DEP_C28. Otherwise, go to DEP_END.

Content type: NOTE TO DATA USERS:
The condition DEP_C27 is a checkpoint to see if the respondent has said yes to at least 5 of the key questions above. If they did not, then they do not meet the criteria for the major depressive episode derived variable and are sent to the end of the module.

There are two different ways to enter the panic disorder module, as described in the two conditions below. The flow is based on responses to two screener questions: SCR_Q20A and SCR_Q20B. Respondents who say "yes" to the first screener question (SCR_Q20A) are not asked the second screener question, so they will go to PAD_R01A. Respondents who say "yes" to the second screener question will go to PAD_R01B.

NOTE TO DATA USERS:
PAD_R01A to PAD_Q02P - Questions on symptoms of panic attacks.
PAD_C03 - Condition to determine whether or not respondents meet a symptom threshold to continue in the module.
PAD_Q04 - Question on whether symptoms developed suddenly and reached their peak within 10 minutes.
PAD_Q05 - Question on the number of lifetime attacks.
PAD_Q06 to PAD_Q08 - Questions for respondents who have only experienced one panic attack in his or her lifetime. Respondents are skipped out of the module at the end of these questions.
PAD_Q10A to PAD_Q10C - Questions on the recency of attacks.
PAD_R13A to PAD_Q16 - Questions on experiences following an attack that lasted a month or longer.
PAD_R17A to PAD_Q19 - Questions on the number of lifetime attacks associated with the following situations: (1) unexpected, "out of the blue", (2) when a person has an unreasonably strong fear, and (3) when a person is in real danger.
PAD_C20 - Condition to determine whether or not the respondent has experienced at least one unexpected, "out of the blue" attack in his or her lifetime. Respondents with none are skipped out.
PAD_Q22 - Question on the amount of interference the unexpected, "out of the blue" attack(s) caused in the respondent’s life.
PAD_C23 - Condition to determine whether or not the respondent has experienced more than one unexpected, "out of the blue" attack in his or her lifetime. Respondents with only one are skipped out.
PAD_Q25A to PAD_Q25C - Questions on whether unexpected attacks resulted from physical illness or injury or the use of medication, drugs or alcohol.
PAD_Q36 to PAD_Q37A - Questions on the recency of unexpected, "out of the blue" attacks.
PAD_Q40 to PAD_Q42 - Questions on emotional distress and physical sensations in the past 12 months.

In this next part of the interview, we ask about how people react to very stressful events that might have happened anytime during their life. Some questions might be a little more sensitive than others.

Please take a few minutes to read the events on the reference card and check off the events you have experienced at any time during your life. This card is provided to help you keep track of these events and you may take it with you at the end of the interview.

INTERVIEWER: The respondent should complete the first column (Experienced Event in Lifetime?) and count the total items marked in the column. The second column will be used later in the module.

Social Provisions Scale 10 Items (SPS)  
Core content

This module is based on the Social Provisions Scale (24 items) developed by Cutrona and Russell (1989), and validated in French by Caron (1996). For this survey, Dr. Caron developed this shorter version with 10 items, which maintains the psychometric properties of the original instrument.

The next few questions are about your experience with mental health or resilience training over the past 5 years.

By ‘mental health or resilience training’, we mean psychologically-oriented training done in a group setting that is meant to help you cope better with stresses or personal problems.

Do not include one-on-one counselling (for example, with a mental health professional, a peer, or your supervisor).

INTERVIEWER: Press <1> to continue.
MHT Q01

Please refer to page 28 of the booklet.

Over the past 5 years, have you received any mental health or resilience training...?

INTERVIEWER: Read categories to respondent. Mark all that apply. If necessary, explain that "PSP" stands for Personnel Support Program.

Strengthening the Forces programs include "Managing Angry Moments" Workshop, "Basic Relationship Training", "Stress: take Charge!", and "Mental Fitness and Suicide Awareness".

If respondent is unsure whether their training is "a career course" or "trades training", select category 3 for "career course".

For training received as a CF recruit, select category 3 for "career course".

1 In preparation for a CF deployment (e.g. "Road to Mental Readiness (R2MR)", "First Aid for the Warrior Mind" or "Programme d’entraînement à la résilience militaire (PERM)")
2 At the end of a CF deployment (e.g. during decompression in Cyprus)
3 During a career course intended to prepare you for a higher rank (e.g. the Primary Leadership Qualification course)
4 During trades training (training intended to qualify you for a particular military occupation)
5 Through the PSP personnel at the base health promotion office (e.g. as part of the Strengthening the Forces program)
6 As part of routine unit training, professional development, or any other work-related activity
